

SWITCH – aka Dave Taylor

Hotly tipped as one to watch for 2006, Dave Taylor has more than delivered and is clearly cranking things up a level in 2007.

From his incendiary DJ sets across the globe to his remixes and productions, Dave, aka Switch and also known as Solid Groove, has created his own type of innovative jacking house that draws from all the best bits of electronic music.

His Dubside label continues to flourish, releasing his own music as well as that from house music's brightest young stars. Only ten releases old the label is a must have in the boxes of all the best DJs and sells out as soon as it hits the shelves.

Dave has been shooting all over the world in search of exciting new music, but comes home to the UK regularly for a residency at the legendary Fabric club.

2007 sees him producing much of the new M.I.A. album, remixing everyone from Medhi to P Diddy, and putting the finishing touches to his Switch and Solid Groove album projects. Catch him if you can.
